

Lai-Momo & Carteria

PARTNER DESCRIPTION: Lai-Momo and its ethical fashion laboratory Cartiera are two organisations that operate in the field of immigration and intercultural dialogue, as part of the Ethical Fashion Initiative programme by the United Nations.

With their projects, they offer new employment and social integration opportunities, through tailoring and leatherworking training programmes, to migrants and political asylum seekers.

PROJECT: We donate our end-of-production textiles and leather, as well as technical equipment, that Cartiera's aspiring artisans use to create new products. In 2019, we hosted a training session for aspiring artisans, helping them improve their leather working techniques. Cartiera's artisans also manufacture the cotton dust bags covering FENDI's products.
